

## Mixers & Agitators

### Mixers and Agitators Overview

TDS can supply Agitators and Mixers for use across a range of industries and applications. These are available with shaft lengths ranging from 600 mm and can be supplied with a choice of shaft materials, providing options to ensure chemical compatibility. In addition, our mixers can be supplied with Single or Three Phase motor power supply options and have a mounting flange as standard. We can offer models with slow or fast turning mixers providing suitability for many different chemicals and mixing applications.
